

Teech: Contributor Summary

Repository: github.com/Aelowww/Teech

Overview

Member	Commits	Workload	Main area
Carl Gemuel Taberna (Aelowww)	45	Very heavy	Project lead: frontend, backend, database, core features, admin console, email
anniesrdnl	9	Heavy	UI and visual design for mobile and desktop
Shirozou	3	Moderate to heavy	Desktop layout
AlykSanFR	2	Light to moderate	Badges, login streak and points shop redesign
doj1666	2	Light	Help chat fix, faculty ID upload and email fix

Commits are the ones shown in GitHub Insights, minus duplicate commits and commits whose changes are no longer in the live app. Workload is based on how much of the app each person built, not only the number of commits: a few members made fewer but very large commits.

What each member did

Carl Gemuel Taberna (Aelowww) 45 commits Very heavy

- Set up the project, the database and the backend, and wrote the README and architecture docs.
- Built the student and faculty pages and the full booking flow, including protection against double booking, appointment codes and rooms, and cancelling.
- Built the mobile layout and features: badges, login streaks, points shop, notifications, profile photos, account deletion and the welcome screen.
- Built the help chat with an AI fallback and hardened security in the database.
- Added request status tabs, faculty presence status, loading screens, success popups and app icons.
- Built the admin console and the student and faculty ID verification process.
- Set up email sending with branded templates, the 6-digit sign-up code, and password reset by email.
- Handled the deployment setup and fixed issues across the app.

anniesrdnl 9 commits Heavy

- Redesigned the mobile UI: buttons, links, navigation icons, notification bell, notifications feed, login streak, help chat and loading screen.
- Designed the profile, personal info, change password, sign-out and avatar screens, and the appointment request pages.
- Built the badge showcase and redesigned the confirmation popups.
- Did a large redesign of the desktop layout and its components, including the student and faculty home pages.
- Added live updates and count-up number animations, plus desktop loading skeletons.

Shirozou 3 commits Moderate to heavy

- Built the desktop layout foundation, including the switch that picks the mobile or desktop layout for each device.
- Created desktop versions of the app's components and pages: booking steps, points shop, badges, help chat, notifications and profile settings.
- Added loading skeleton screens for the mobile pages.

AlykSanFR 2 commits Light to moderate

- Redesigned the badges with a new medal design, plus the badge grid and badge showcase.
- Redesigned the login streak card and the points shop.
- Made UI fixes across the request, calendar and booking pages.

doj1666 2 commits Light

- Fixed the help chat's question length limit and its error messages.
- Made faculty ID uploads happen safely after email confirmation, and fixed the database lookup used by the verification emails.
